LAWN FERTILISING IN WINTER

Foliar feeding (through the turf leaf) is more effective in winter when the transfer of nutrients from soil to plant slows down, as does the lawns growth, entering a near dormant state.

Foliar feeding is also more environmentally friendly in the cool season, when less nitrogen is required and rain leads to run-off. Apply TURFECT GROW now every 4 weeks. Good time to apply a pre-emergent herbicide.

HAVE YOUR POOL WINTER READY!

Winter Pool Care Facts www.betterpetsandgardens.com.au/pools-and-spas/winter-pool-care/

A Long-Life Algae Killer will prevent algae growth over the coming months. These are usually copper-based, will last up to 3 months, and ensure an algae-free start to spring.

BARACUDA Algae Killer 1L

\$23⁷⁵
3 MONTH APPLICATION

One final shock treatment should be added to your pool to help kill any lingering bacteria and/or algae. This helps to ensure a clean start to next season.
